ELEMENTS SOFTWARE
CTOUCH Canvas

COLLABORATE IN ANY MEETING ROOM

The CTOUCH Canvas touchscreen turns meeting rooms in awe thanks to its unique design and high security standards. But brains are more important than beauty right? The Elements software of the CTOUCH Canvas provides for snappy whiteboarding and easy wireless sharing for business environments. Making instant meetings, instantly efficient and fun!

Share, inspire, have fun!
With CTOUCH by your side.

CTOUCH®

✓ The essential elements for collaboration: whiteboarding and wireless screensharing

Any touchscreen should have two applications out-of-the-box: interactive whiteboarding and wireless screensharing. The CTOUCH Canvas comes with a software package called 'Elements'. This consists of the whiteboarding application FlatFrog Board for Rooms, combined with AirServer wireless sharing. Ideal for enabling flawless brainstorming, planning and presentations in all types of meeting rooms.

✓ FlatFrog Board for Rooms

FlatFrog Board for Rooms is a business whiteboarding application designed for the FlatFrog InGlass™ touch technology used on the CTOUCH Canvas touchscreen. It focusses on activities commonly seen in business environments such as brainstorming, planning and teamwork. Templates are included for Agile planning, Scrum, Kanban, SWOT analyses and project planning. The whiteboard distinguishes between pen, finger and hand, and allows for opening, saving, exporting and e-mailing of your whiteboard sessions.
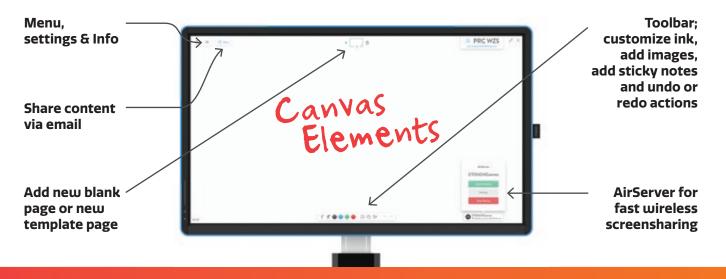

✓ AirServer wireless sharing

AirServer allows you to share your screen – presentation, video, Office document – through native, wireless screensharing. This means that you do not have to install anything on your phone, tablet or PC to share your screen. You simply share your screen through the wireless sharing tool that is already put on your device by the manufacturer. For Apple products, AirServer works with AirPlay. For Android and Google products, Airserver supoorts Google Cast. And for Microsoft Windows and Linux systems, it works perfectly with Miracast.

Up to 9 devices can share their screens at the same time, with or without PC touchback (for Miracast) and fully configurable from the AirServer settings menu (for instance pin codes for limited access).

✓ Ready to go!

Each Canvas screen is provided with a license card. With this card and an Internet connection, you can install the Elements software easily and fast. Either on a CTOUCH OPS (available separately), or on your own PC. Write and annotate with a pen-on-paper-like experience on the CTOUCH Canvas!
