# CTOUCH HELLO BOARD

GET ON BOARD WITH COLLABORATION

Collaboration has just peaked. Meet the intuitive, all-in-one CTOUCH Hello Board, which elevates meetings at an attractive price point.

Want to make better use of apps like PowerPoint, Miro or Microsoft Planner during your meetings? Get on Board now!

Share, inspire, have fun!
With CTOUCH by your side.

CTOUCH®
Part of i3-Technologies

✓ Collaboration as it's meant to be

When teams get together using a touchscreen, magic happens. CTOUCH Hello Board is our most complete collaboration solution to date. Here's how it makes the difference in your meeting rooms:

✓ An intuitive interface, a familiar interface

With only the 5 most-used features displayed on the screen, finding what you need is effortless. Instantly open the whiteboard, start wireless sharing, or access the web browser. The integrated Teams environment is straightforward and familiar: Hello Board uses the desktop version of Teams, making it instantly recognisable to the user.

✓ Whiteboarding made easy

The integrated whiteboard is ready to use within seconds. The handwriting experience is silky smooth. It's secure to use as notes get erased as the whiteboard is closed. Best of all, it fully supports Windows Ink. It's like writing on a tablet, but bigger!

✓ Your favourite Windows apps at your fingertips

Can't spend a day without using PowerPoint, Miro or Microsoft Planner? Hello Board has you covered. As Hello Board runs on Windows, you can use all the Microsoft 365 apps you need. Plus, other Windows-based apps such as Miro!

Rich, JBL® sound throughout the meeting room

A remote meeting where every 'hello' can be heard clearly? With the Hello Board's powerful built-in 80W JBL® speakers, that's exactly what you get. Enjoy video conferencing without the need to strain your ears!

Ready for 2026 – and beyond

Data leaks are the talk of the day, every day. Many have one thing in common: outdated security measures. To mitigate risks, the Hello Board bundle includes Teams and Windows updates for years to come. Stay safe and supported as long as possible.

The sustainable way

Hello Board is designed with sustainability as a key principle. It consists of several separate, modular elements: the CPU, camera and the mounting solution. Want to install a better camera? You can without needing to replace the entire system! This modularity significantly reduces environmental impact by ensuring that perfectly functioning parts aren't needlessly discarded.
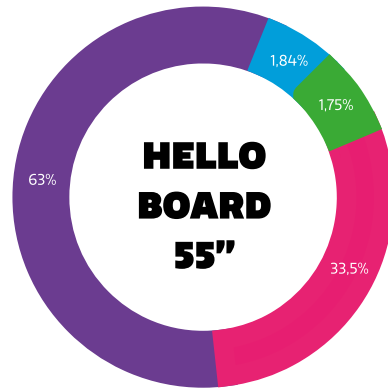

You are in charge

Hello Board doubles as a room booking system. Invite the room to a Teams meeting and just like that, the meeting room is yours. The screen clearly displays upcoming meetings, so there cannot be any confusion on who booked it. The home screen is also fully customizable. Want to change the background image? How about your company logo on the screen? A QR code to the birthday calendar? A group photo of the latest teambuilding event? All is possible!
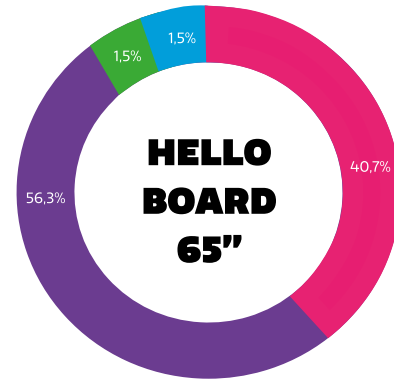

Hello Board and its product footprint

The product impact is calculcated using the EU Product Environmental Footprint method (PEF).
